ALBUQUERQUE, — JUNE 2, 1908

Now for a big Fourth of July celebration, and then for the Territorial fair.

BLANCO undoubtedly wishes he had not been chosen to succeed Weyler at Havana.

It is estimated that the hay crop of Salt River valley, in Arizona, will amount to about 400,000 tons.

HON. JOHN MORROW was the orator of the day at Memorial day, and his address was an eloquent one.

BERNARD is ill again. This may be the effect, or it may have been the cause, of his ungenerous utterances concerning America.

WE knew it! Dewey now admits that on May 1 he wore on his watch chain a rabbit's foot. Here is a chance for the polly ped.

THE Hermosillo and Guaymas orange crop was very heavy this year, 154 car loads being exported to the United States and eleven to Canada.

THE Memorial day oration, at Las Vegas, was delivered by Hon. W. H. Pope, of Santa Fe. He is considered one of the finest and best orators in the territory.

WORK has been begun on the great irrigation canal in Chihuahua, Mexico, to take water from the San Diego river. It is to cost about \$400,000, and will irrigate about 100,000 acres.

THE young graduates of the High school, at the opera house last night, listened to a masterly address from Hon. Nell B. Field. He spoke words of genuine wisdom, and his advice will no doubt be heeded.

THE La Belle Cresset, published up in Taos county, states that mining in that section of New Mexico is looking up, and big results are expected as the outcome of development work on several mines near La Belle.

ON next Monday, June 8th, school districts of the various districts of the territorial counties will be elected. County Superintendent Perez informs THE CITIZEN that in some of the districts of this county the elections will be quite lively.

COL. HENRY WATKINSON, the gifted editor of the Louisville, Ky. Courier-Journal, sent his boy forward with the advice to "enlist as a private and fight like the devil." Therefore we will probably have only one Col. Watkinson for some time to come.

THE Spanish war is looked upon as a special dispensation of Providence by the magazine editors. The civil war had about been written dry, the Napoleonic era had faded and all the pictures of Lincoln had been printed to the limit of their capacity for printing.

MEN and women who had the good fortune to be schoolmates of George Dewey are making the fact known wherever a newspaper is printed in the English language. That old Vermont school house must have been an immense structure or else young Dewey spent the first twenty-five years of his life in accumulating schoolmates.

THE board of directors of the San Miguel National bank, Las Vegas, held a meeting on May 28th and unanimously adopted resolutions of condolence on the death of young Ired Cochran, whose and untimely demise occurred at San Antonio, Texas, where he had gone as one of the New Mexico volunteers. When young Cochran enlisted he was an attaché of the San Miguel National bank and it was proper that the directors should meet and pass such resolutions. The remains were taken to Las Vegas, and their burial made a part of the exercises on Memorial day.

THE price of all farm and ranch products averages higher than for many years past and there is every reason to believe that good prices will be maintained for a considerable higher period. Our farming and stock raising industries may, therefore, expect continued and increased prosperity for all necessities of life grown for man and beast. There will, of course, be fluctuations in the market and an occasional break in prices, but the outlook, as THE CITIZEN sees it, is for a continued advance in meat, provisions and grain for some time to come. The man who goes from merchant to merchant and seeks patronage by howling dull times and low prices for the summer months, ought to be run out of town, or "sent upon."

LAST Sunday, the baccalaureate sermon of the Normal school, Silver City, was delivered by Rev. A. A. Hyde, pastor of the Methodist church, and the Silver City Independent states that the sermon was very impressive and interesting. On

THE MINES OF NEW MEXICO.
Dispute Over the Waters of Peralta Canyon May Retard the Albarmar.
EASTERN CAPITAL COMING THIS WAY.

Santa Fe, N. M., May 28.—Mr. Mason, a Philadelphia capitalist, who has been here a few days, predicts an enormous influx of Pennsylvania and New York capital. Mr. Mason expects particularly impressed with the possibilities of the Cochiti district. Just now a dispute between the miners in Peralta canyon and the Cochiti Mining company is engaging attention. The former have gotten out an injunction restraining the latter from taking water from that canyon for use in operating the big Albarmar mill and mine. Work on the Albarmar mine is being steadily pushed, the main shaft is being sunk and better ore is being constantly shown as depth is attained. The air compressor is about ready for use and will be used in operating hand drills in the mine work.

At the Crown Point, since the return of O. F. Posey from the east, a force of men has been put to work developing water in Medio Rio canyon. It is understood the new company, of which Mr. Posey is the principal figure, and which has under lease and bond the Crown Point, Grant and Ball of the Woods mines, intends to let a big contract for the development of the Grant, which is considered the best property of the three. They are well satisfied with the Crown Point mine, and it is authoritatively learned that an early date will witness the beginning of the construction of a 200-ton mill on the ground to treat the ore of the three mines mentioned, and what custom ore can be handled.

The Lone Star is steadily producing an excellent quality of ore for treatment in the Albarmar mill, which is making preparations for adding thirty stamps to its present capacity. The mine is being operated by Chicago capitalists. On the Smuggler the contract work is making good headway and the operators will soon be in a position to be conducting operations full blast, while the Julia No. 2, which is being worked by Clausen & Yarmann, is in fine ore and continues to improve. In Peralta canyon, William McCoy and Arthur Knaebel are developing some valuable mining property belonging to them, and in the Colliery Warlock & Evans have completed assessment work on the Argonaut, a valuable property in the east fork of that canyon. The Benton, in Cerillos district, which is managed by R. M. Force, is fast becoming a great producer. The shaft is down 300 feet, and at that depth the ore has changed color, still holding its value at over \$150 per ton. A recent examination of the dump, containing thousands of tons of ore, shows it to contain much more value than was heretofore thought. The Ortiz is also making its usual good showing, every day there being taken out from eighty to 100 tons of very large ore, and the capacity is soon to be extended. The Monte Cristo Mining company will put in some heavy machinery to handle the placer ground which they own near Golden.

GOLDEN, SAN PEDRO AND DOLORES. In the Golden, San Pedro and Dolores camps there are great tracts of rich placer ground, and as is expected, the plant to be put in by Edison, the great electrician, is a success. It can be asserted that more gold will be taken from these camps in a comparatively short time than has been taken from any part of the Rocky mountain region in ten years. In the Moreno district considerable development work has of late been in progress and some extremely good results obtained though at none of the mines thereabouts has any considerable depth been attained. The Bandana group is at the head of the list of producers, more than \$100,000 having been taken from a depth of less than 200 feet. The Moreno, which also belongs to this group, is now a shipper at a depth of 100 feet and will while the low grade ore will be treated at the Bandana mill. Recent shipments from this property returned over \$100 per ton in value. The Galena and American flag, belonging to this group, have opened up good ore at a shallow depth. The Legal Tender has a record of \$150,000 from its shallow workings and systematic development will make this property a good producer.

The Mills Tunnel company, near the Bandana, is running a tunnel to cut some well-known veins and are preparing to push the work on that property in a vigorous manner.

The Ajax is equipped with a good mill and has shipped considerable tonnage, and the Hidden Treasure has developed a very large ore body, and is being supplied with good machinery preparatory to sinking its shaft to a depth of 500 feet.

The Montezuma Gold Mining and Milling Company is one of the strongest companies operating here, and owns a number of placer and lode claims. They are procuring machinery with a view of developing their property to a depth of several hundred feet.

The Indians, which is southwest of Old Bland, has been prospecting to a depth of one hundred feet and shows a good strong vein, with a pay streak of about twenty inches, which assays from \$30 to \$200 per ton.

The Lexington shows a good ore body and work is being energetically pushed. This property has recently been equipped with a good hoisting plant and pump. The work of the Tom Boy is progressing very favorably and the owners expect to strike the rich ore they are diving for in the near future.

The Grand View, owned in London, has about 600 feet of development and the work steadily progresses under the London manager, who has recently assumed supervision of that property. Other districts, including the Red River, Rio Grande and the southern districts in the Mogollon and Organ mountains, are reported to be equally as active as the above named, and mining men all over the territory are unanimous in asserting that never before have prospects seemed so bright nor realties so substantial in New Mexico as they do at the present time.—Denver Republican.

INDIAN CREMATIONISTS.
How the Yuma Indians Dispose of Their Dead.

C. S. Hilton has just returned to Los Angeles from Yuma, where he has been

in the employ of the Southern Pacific. During his stay in Yuma there were four deaths among the Indians on the reservation, and following their usual custom the bodies were burned. Captain Hilton tells the Express that these Indians are "natural born" cremationists, and have the business down to such a science as to discount all the expensive modern crematoriums in point of effectiveness. Their plan, the captain says, is a very simple one, but it is thoroughly effective. When an Indian dies, the whole tribe have a great pow-wow and details are told of to keep up a regular and systematic waiting up to the time the body is prepared for cremation. When this time arrives, a shallow hole is scooped out in the sand, which is filled with finely splintered wood, on which the corpse is laid. A cord or two of mesquite wood is then piled on top and about the body, the fire is applied and the waiting ceases as if by magic, while the entire band of Indians gather about the burning pile. For a few seconds there is a slight smell of burning flesh, and it is all over. The wood, before to ashes, and when it goes out there is nothing resembling a human frame left, only a comparatively small pile of gray ashes, which are scattered over the desert by the winds.

[Communicated.]
Dr. Aubright on the Fire Department.

Now that the electric fire alarm system in our city has been inaugurated, and the fact that it works like a charm, the argument being almost instantaneous, and that the smoking-bird whistle sounds the alarm most effectively, not only throughout the whole city but also the entire surrounding country, it next behooves our city fathers to look to the other paraphernalia of the fire department. Unless more attention is given to the care of hose and hose carts, before many months a heavy expense will fall upon us for the replacing of these things. How carts and hose should carefully be looked after in every instance and that the smoking-bird whistle sounds the alarm most effectively, not only throughout the whole city but also the entire surrounding country, it next behooves our city fathers to look to the other paraphernalia of the fire department. Unless more attention is given to the care of hose and hose carts, before many months a heavy expense will fall upon us for the replacing of these things. How carts and hose should carefully be looked after in every instance and that the smoking-bird whistle sounds the alarm most effectively, not only throughout the whole city but also the entire surrounding country, it next behooves our city fathers to look to the other paraphernalia of the fire department.
